ARUNACHAM S **- (31523U18008)**

GOWTHAM S - (31523U18029)

MADHAN KUMAR R -(31523U18047)

ARAVIND B A - (31523U18007)

Project Development Phase:

Milestone 1	Salesforce account
Milestone 2	object
Milestone 3	tab
Milestone 4	The Lightning App
Milestone 5	Fields & Relationships
Milestone 6	Roll-up Summary
Milestone 7	flows

Product Backlog, Sprint Schedule, and Estimation :

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Member s
Sprint-1	Developer Setup	USN-1	As an admin, I want to create a Salesforce developer account so that I can configure and deploy the CRICKSTATS system.	1	High	ARISH R

Sprint-1	Data Modeling	USN-2	As an admin, I want to create Player and Match Performance objects so that player and match data can be stored systematically.	3	High	DHANUSH R
Sprint-2	Navigation	USN-3	As a user, I want separate tabs for each object so that I can easily navigate and manage records within the application.	3	High	MADHAN G
Sprint-2	UI Design	USN-4	As a coach, I want a dedicated Lightning App so that all performance tracking features are accessible from one dashboard.	3	High	LOKESH K
Sprint-2	Data Structure	USN-5	As an admin, I want to create player and match fields so that complete performance details can be captured accurately.	5	Medium	ARISH R
Sprint-2	Data Structure	USN-6	As a user, I want customized page layouts so that only relevant fields are displayed during data entry.	5	High	DHANUSH R
Sprint-2	Automation	USN-7	As a system, I want to validate player and match inputs so that incorrect data entries are prevented.	3	High	MADHAN G
Sprint-3	Automation	USN-8	As a system, I want automated flows to update player statistics so that performance data remains accurate.	5	High	ARISH R

INTRODUCTION:

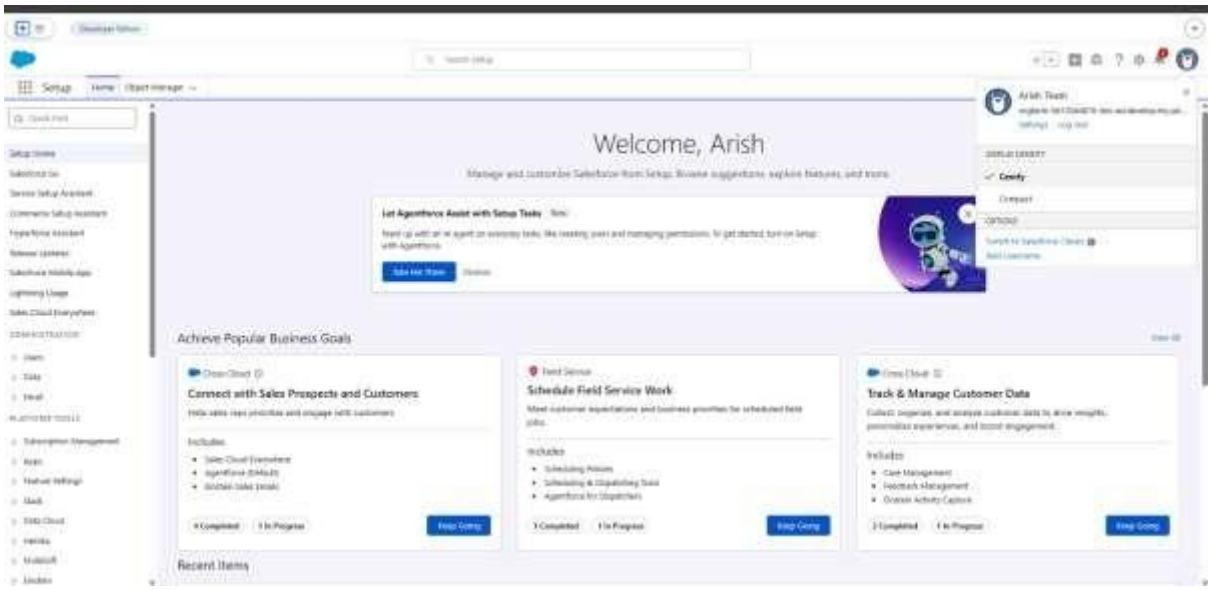
CRICKSTATS is a Salesforce-based application designed to track, manage, and analyze cricket players' performance on a match-by-match basis. The system uses custom objects, relationships, dashboards, and automation tools to provide structured performance insights.

It enables coaches, analysts, and administrators to record player statistics, generate reports, and support strategic decision-making.

Milestone 1 - Salesforce developer account creation

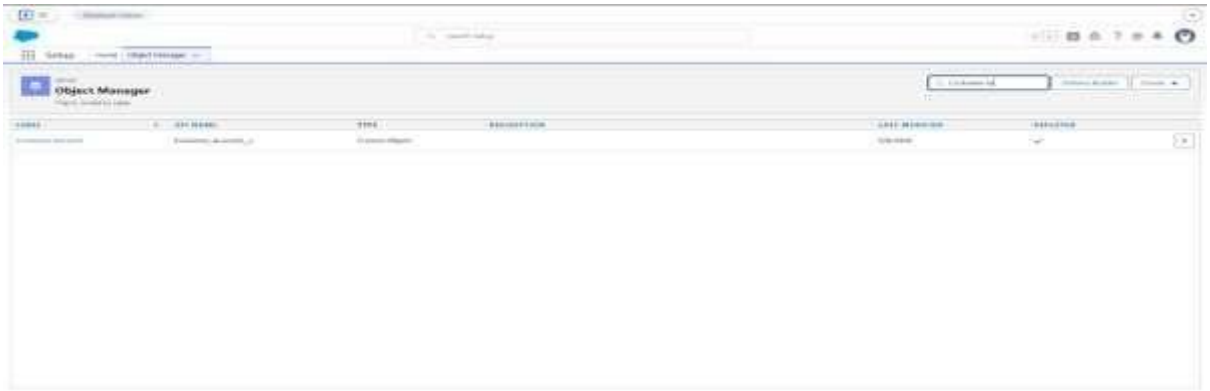
- Successfully Created account in salesforce developer edition

Here is the screenshot of my developer account creation:



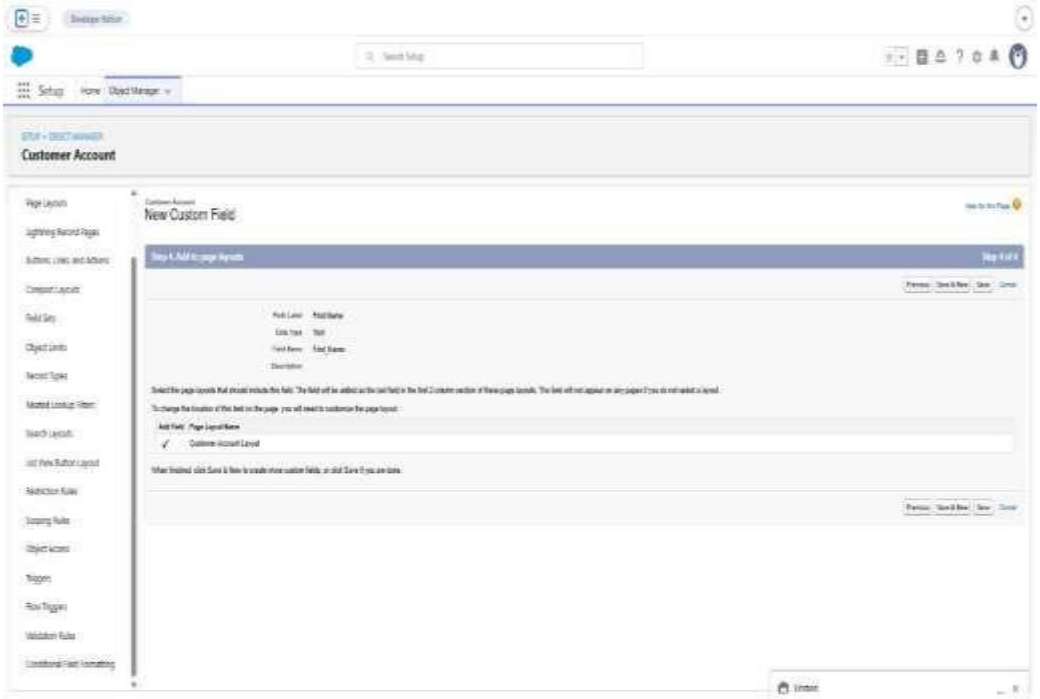
Milestone 2 - Object Creation Step to Implement:

Activity 1 : Player Object

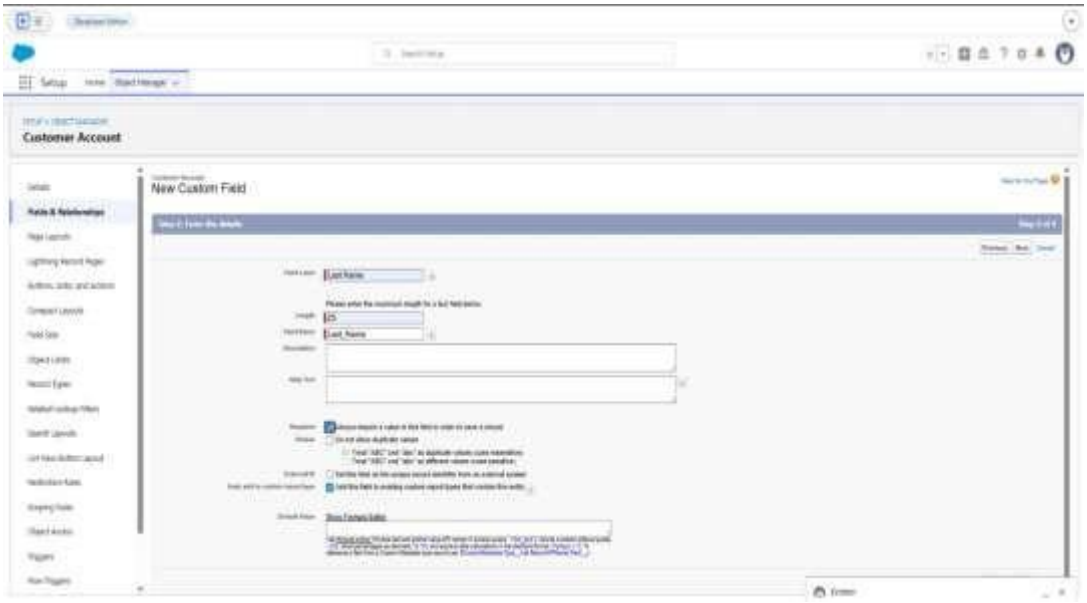


Creating new custom object named 1. First

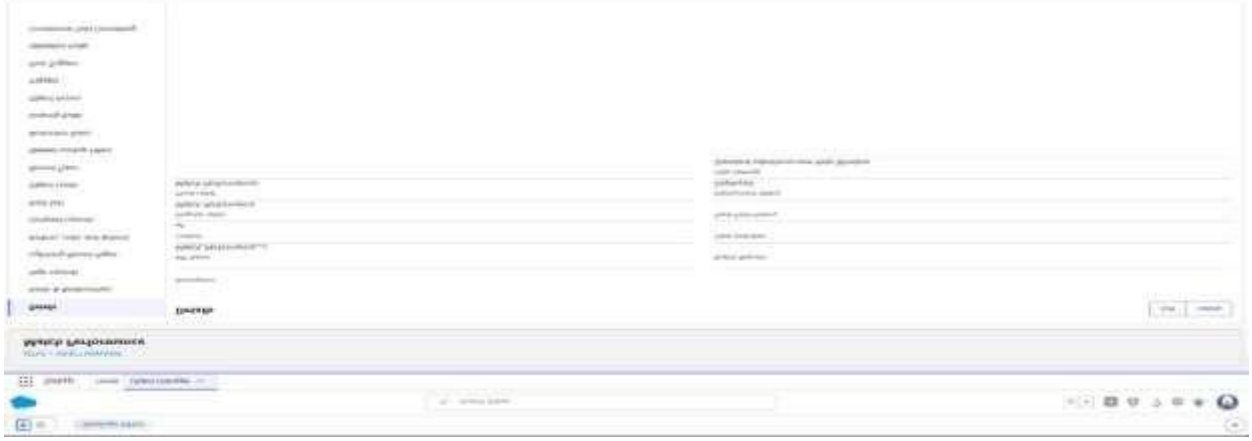
Name:



2. Last Name:



Activity 2 : Match Performance Object



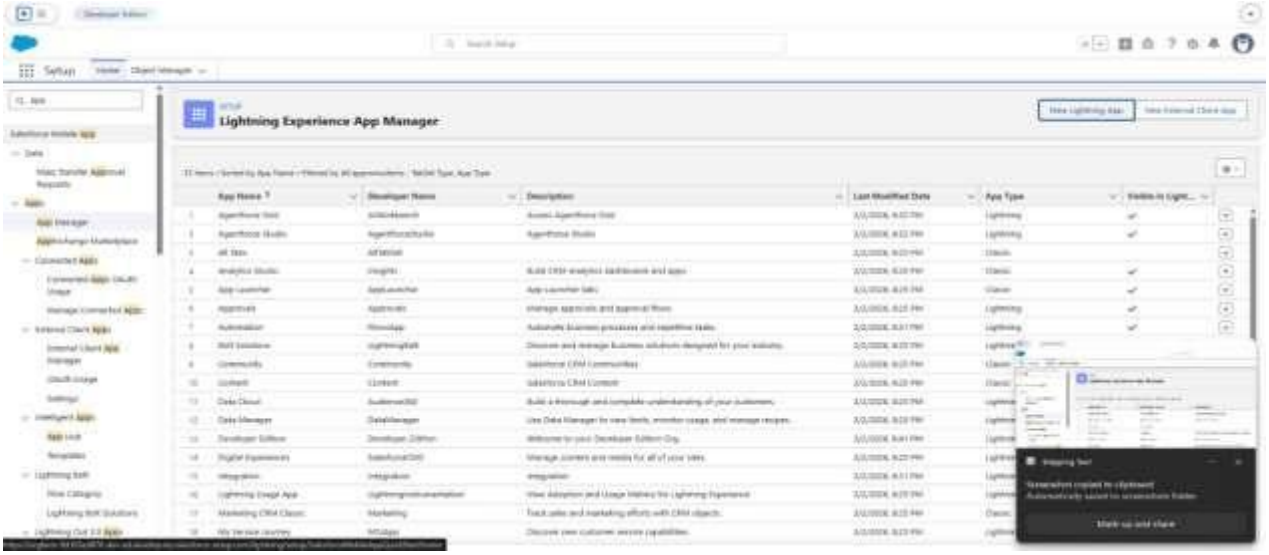
Milestone 3 – Tabs

Activity 1 : Custom tabs creation

Milestone 4 - The Lightning App

Activity 1 : Create a lightning app

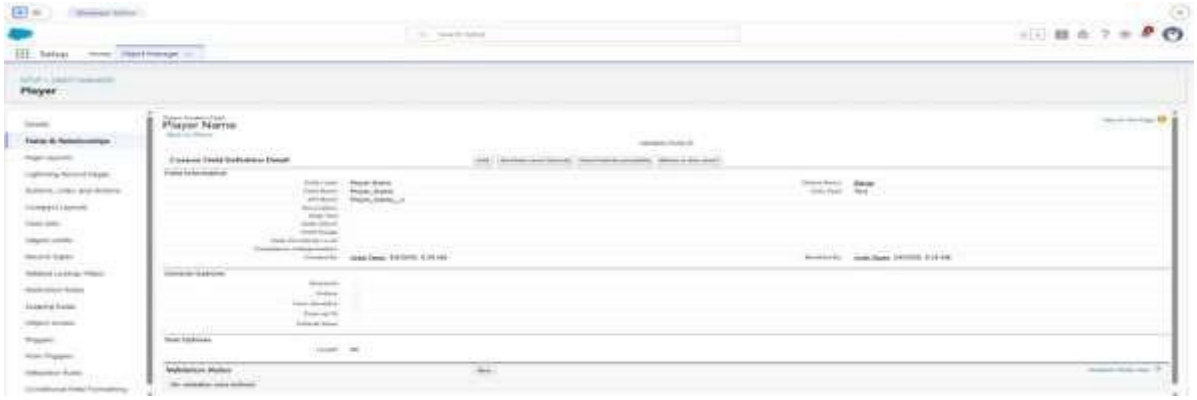
App Name : CRICKSTATS Developer Name : Auto Populates Add image optional (if you want to give any image you can otherwise not mandatory) - Add Primary color Hex or leave it to de



Milestone 5 : Fields & Relationships

Activity 1 : Create Custom fields for Player object

1. Data Type : Text Field Label: Player Name Field Name : Auto Populates Length : 50 Click on Next → Next → Save and new

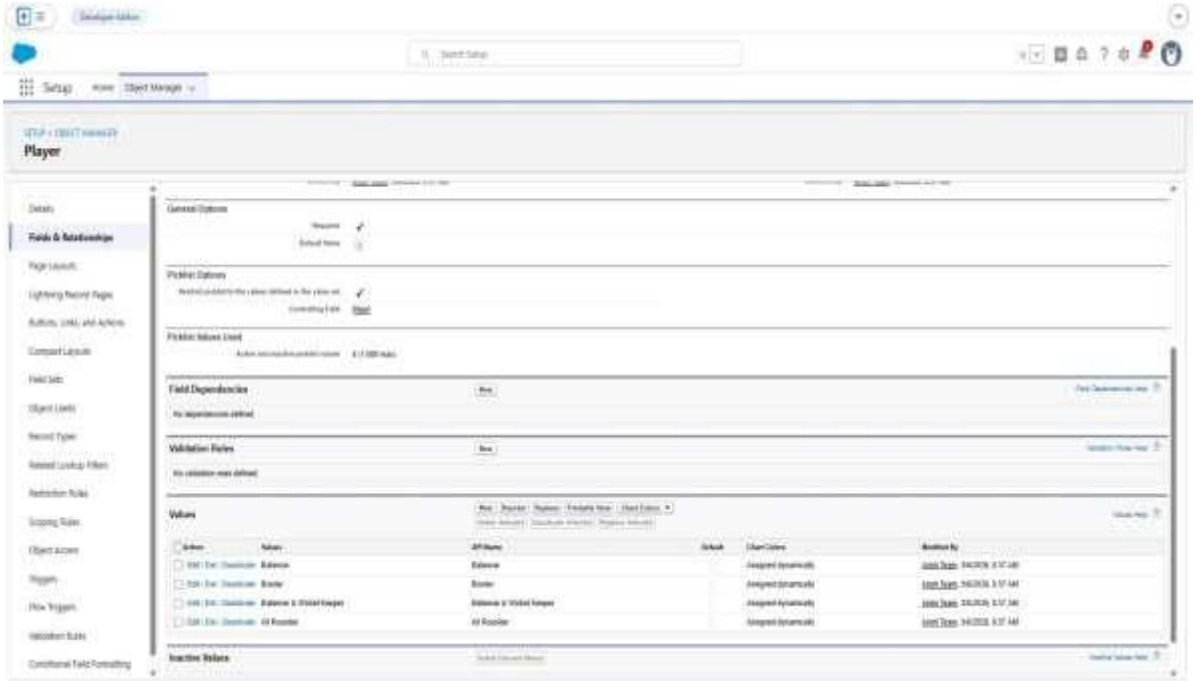


2. Data Type : Rich Text Area Field Label : Profile Picture Field Name : Auto Populates Click on Next → Next → Save and new.

3. Picklist Field Label : Role Field Name : Auto Populates Value :

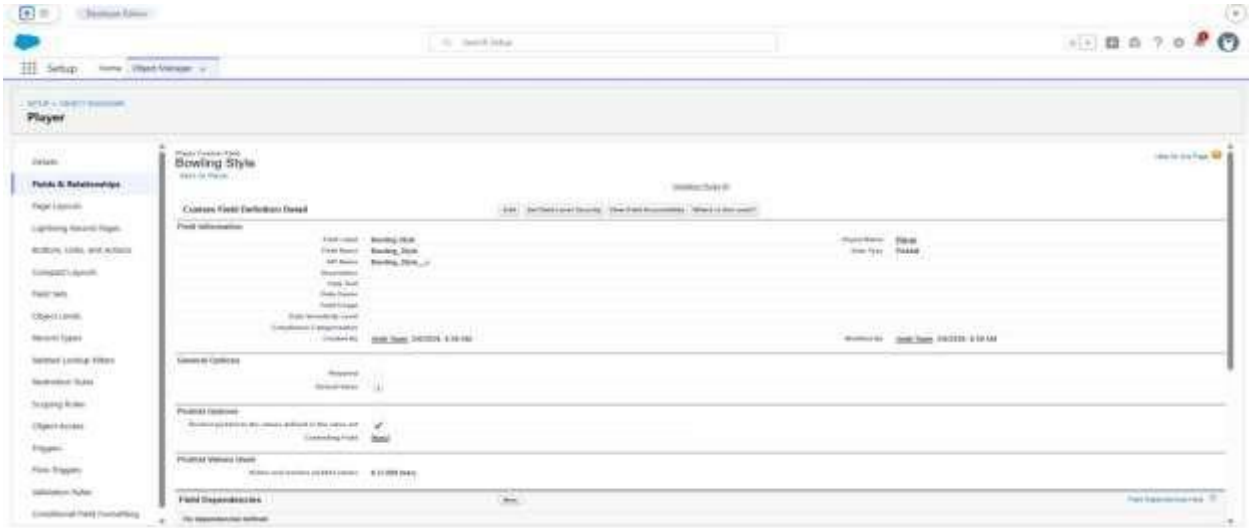
Enter value

- Batsman
- Bowler
- Batsman & Wicket Keeper
- All Rounder



4. Picklist Field Label : Bowling Style Field Name : Auto Populates Enter value:

- Right-Arm Fast
- Left-Arm Fast
- Right-Arm Medium
- Left-Arm Medium
- Right-Arm Spin
- Left-Arm Spin

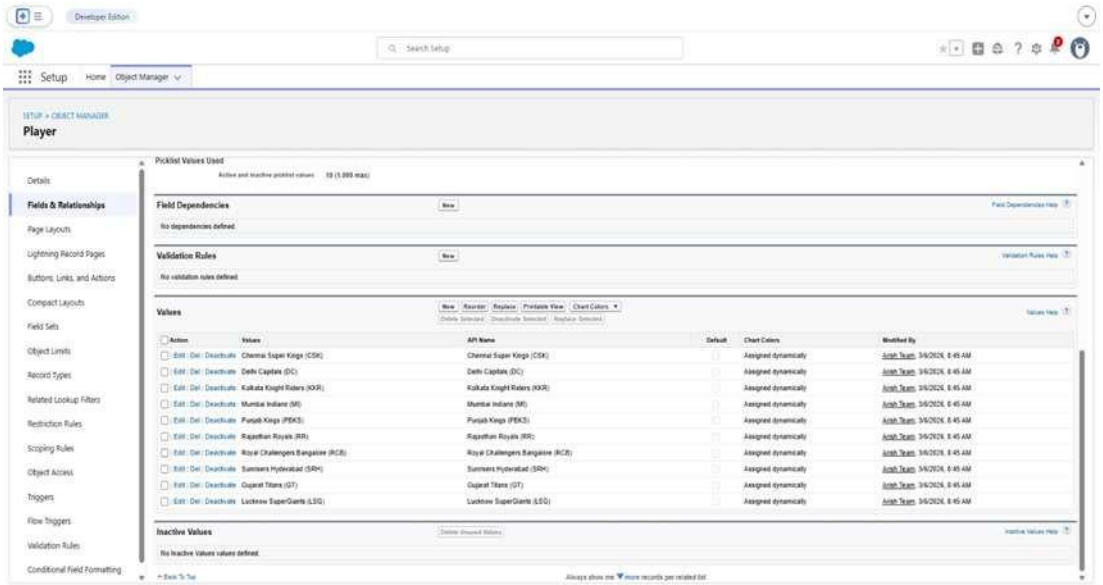


5. Data Type : Picklist Field Label : Team Field Name : Auto Populates Enter value: ○ Chennai Super Kings (CSK) ○ Delhi Capitals (DC)

○ Kolkata Knight Riders (KKR) ○ Mumbai Indians (MI) ○ Punjab Kings (PBKS)

○ Rajasthan Royals (RR)

○ Royal Challengers Bangalore (RCB) ○ Sunrisers Hyderabad (SRH) ○ Gujarat Titans (GT)



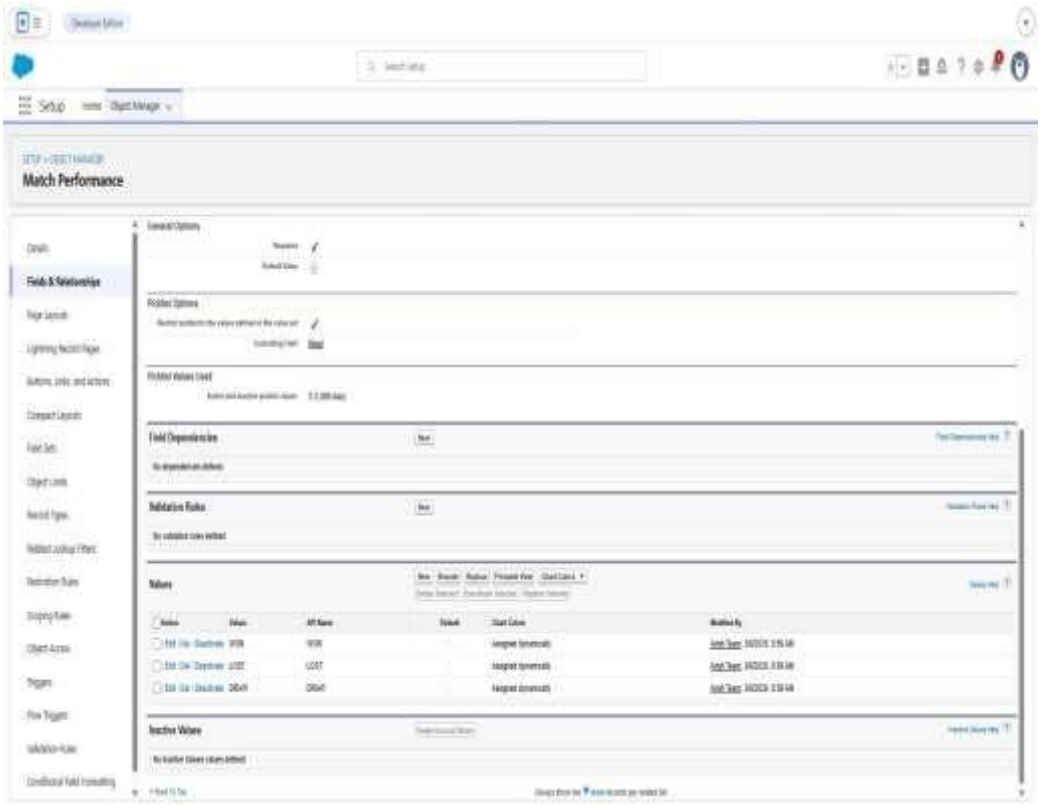
Activity 2 : Create Custom fields for Match Performance object

1. Data Type : Picklist Field

Label: Match Result Field Name :

Auto Populates Enter value:

- WON
- LOST
- DRAW

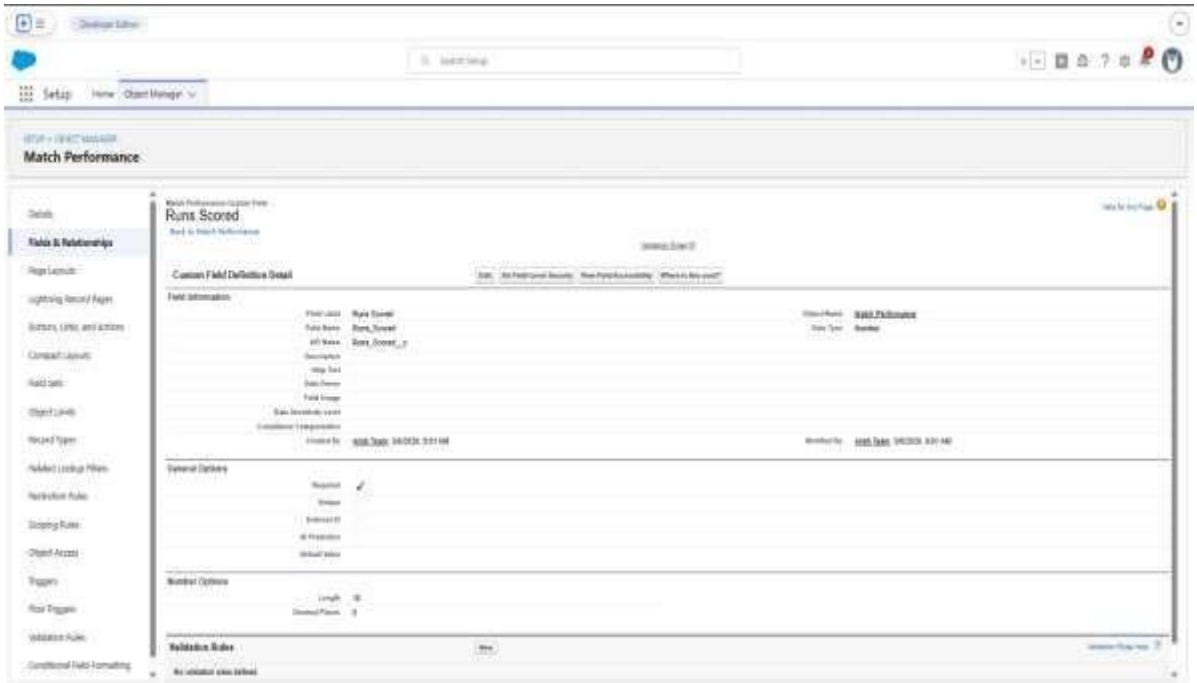


2. Data Type : Number Field

Label: Runs Scored Field Name :

Auto Populates Click on Next →

Next → Save and new.

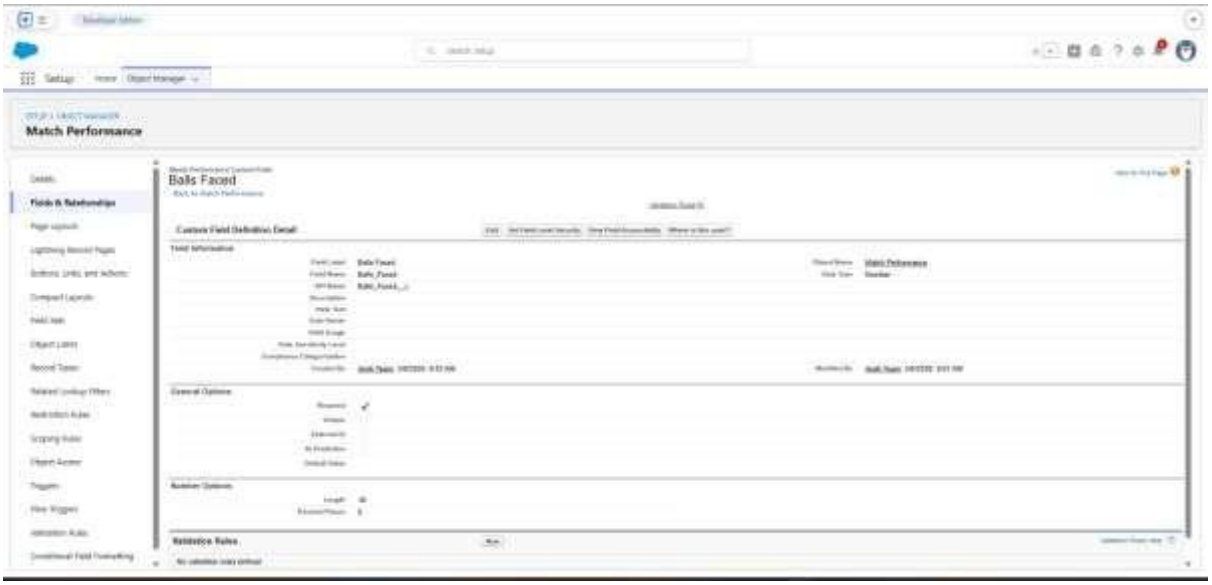


3. Data Type : Number Field

Label: Balls Faced Field Name :

Auto Populates

Click on Next → Next → Save and new.

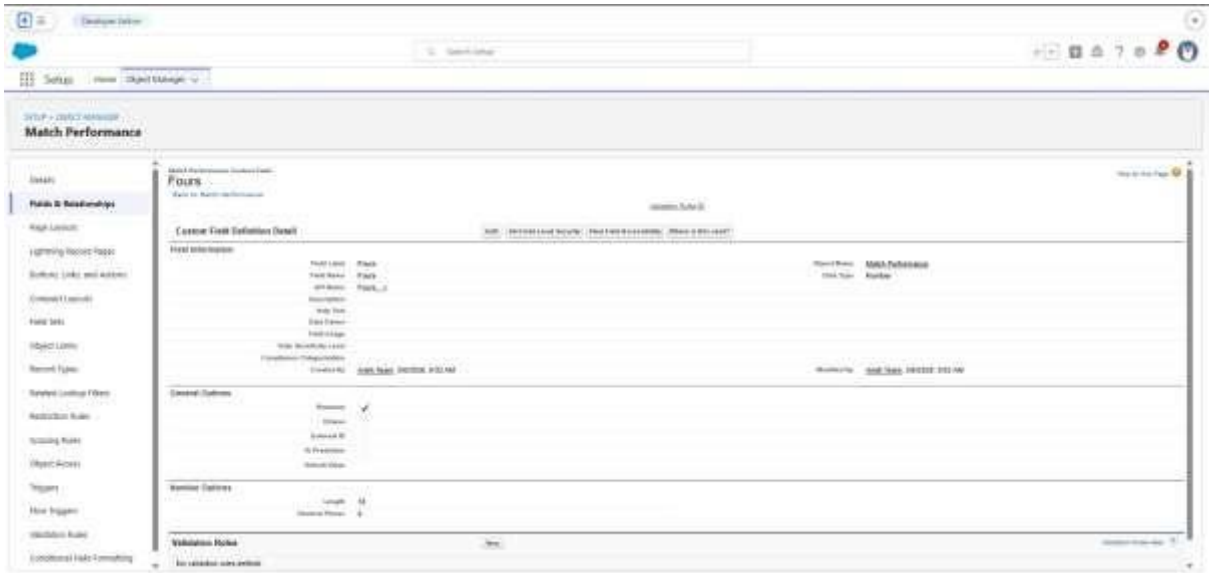


4. Data Type : Number Field

Label: Fours Field Name : Auto

Populates

Click on Next → Next → Save and new.

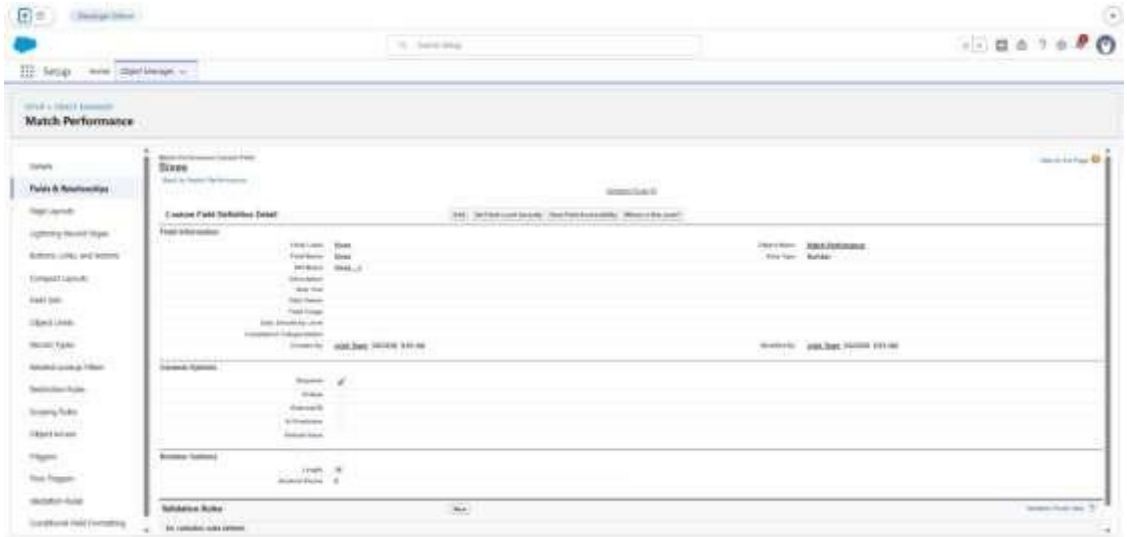


5. Data Type : Number Field

Label: Sixes Field Name : Auto

Populates

Click on Next → Next → Save and new.

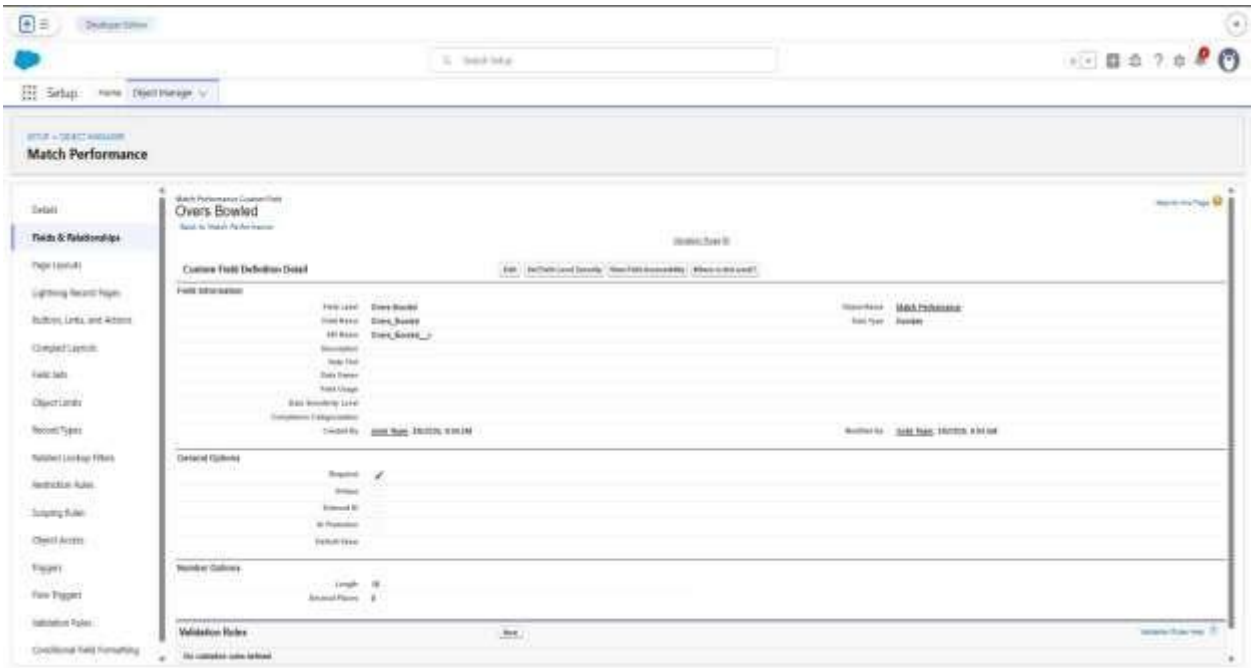


6. Data Type : Number

Field Label: Overs Bowled Field

Name : Auto Populates

Click on Next → Next → Save and new.

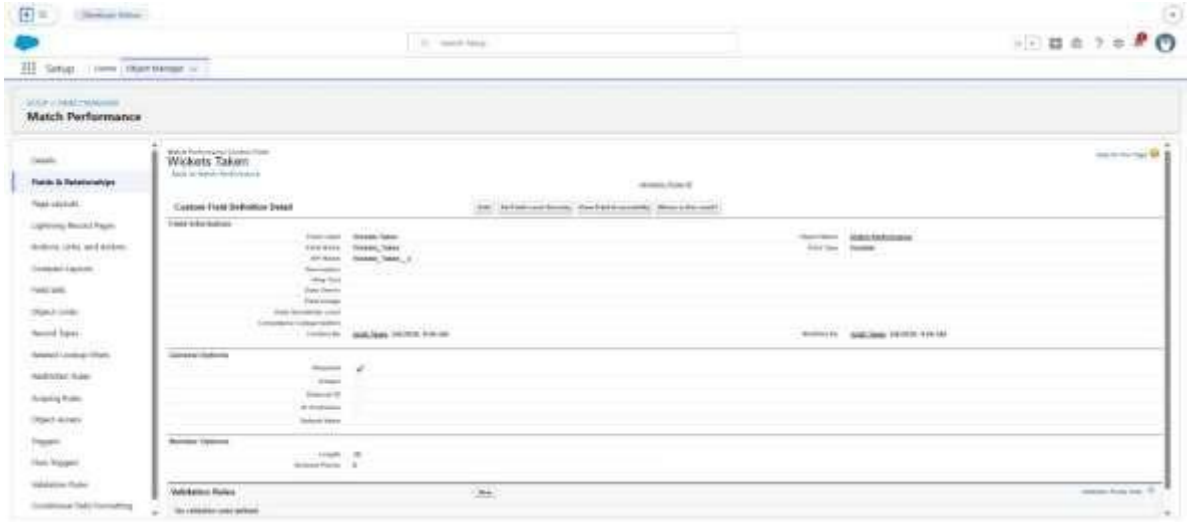


7. Data Type : Number Field

Label: Wickets Taken Field Name :

Auto Populates

Click on Next → Next → Save and new.

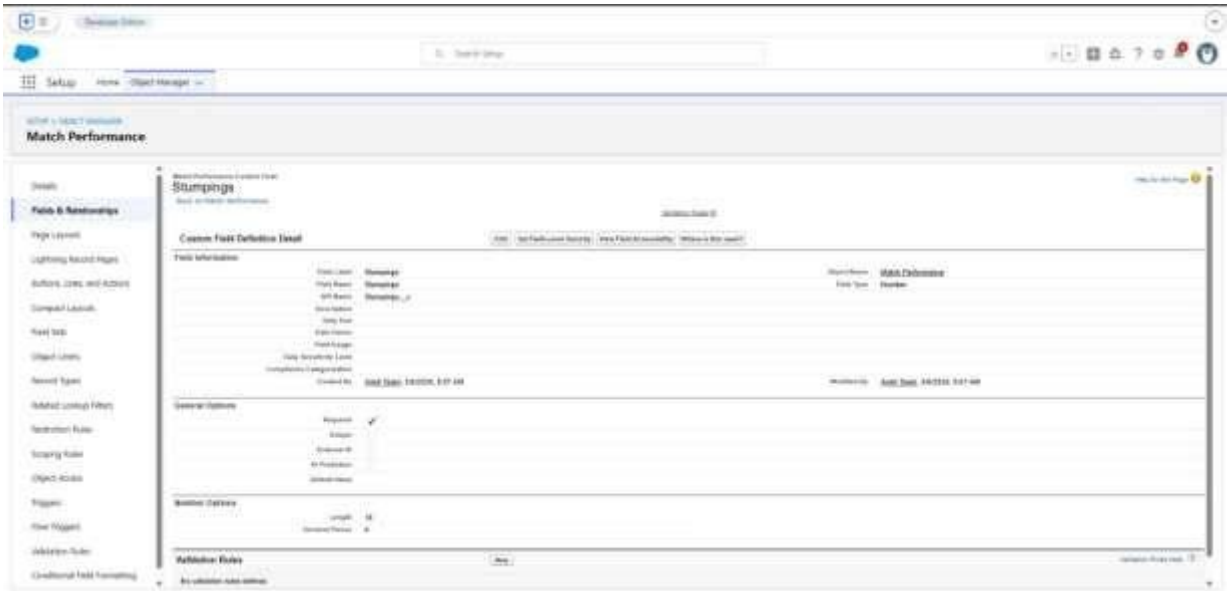


8. Data Type : Number Field

Label: Stumpings

Field Name : Auto Populates

Click on Next → Next → Save and new

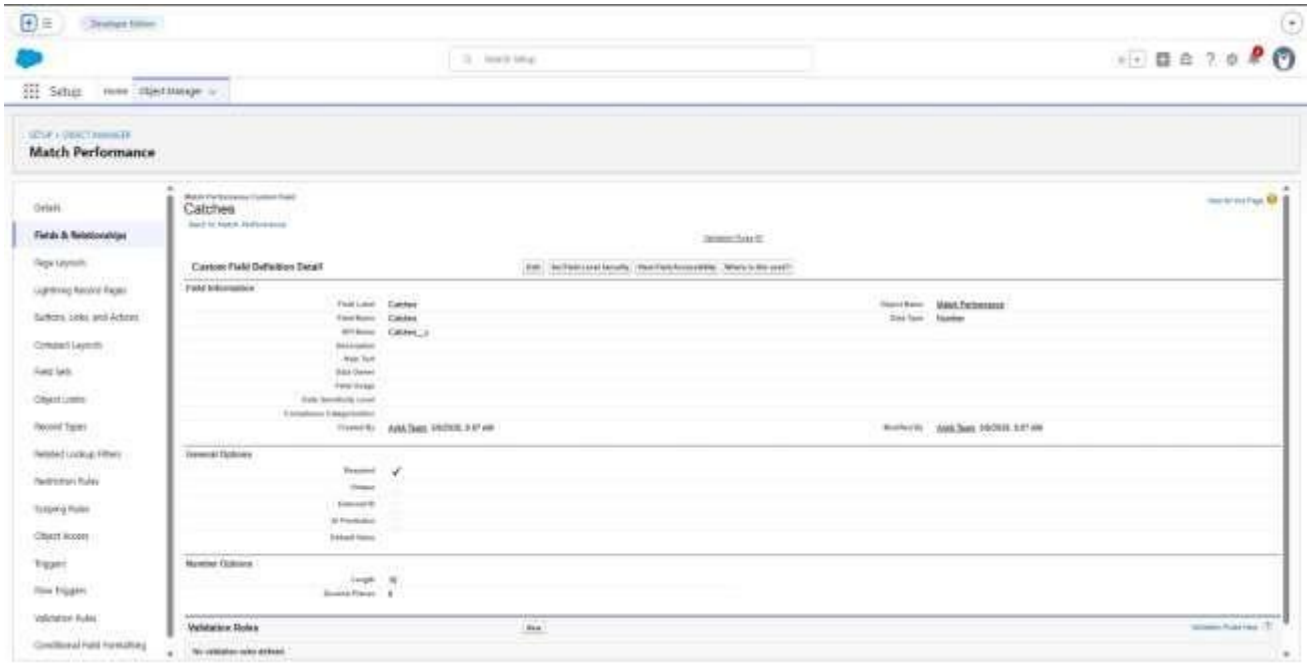


9. Data Type : Number

Field Label: Catches

Field Name : Auto Populates

Click on Next → Next → Save and new.



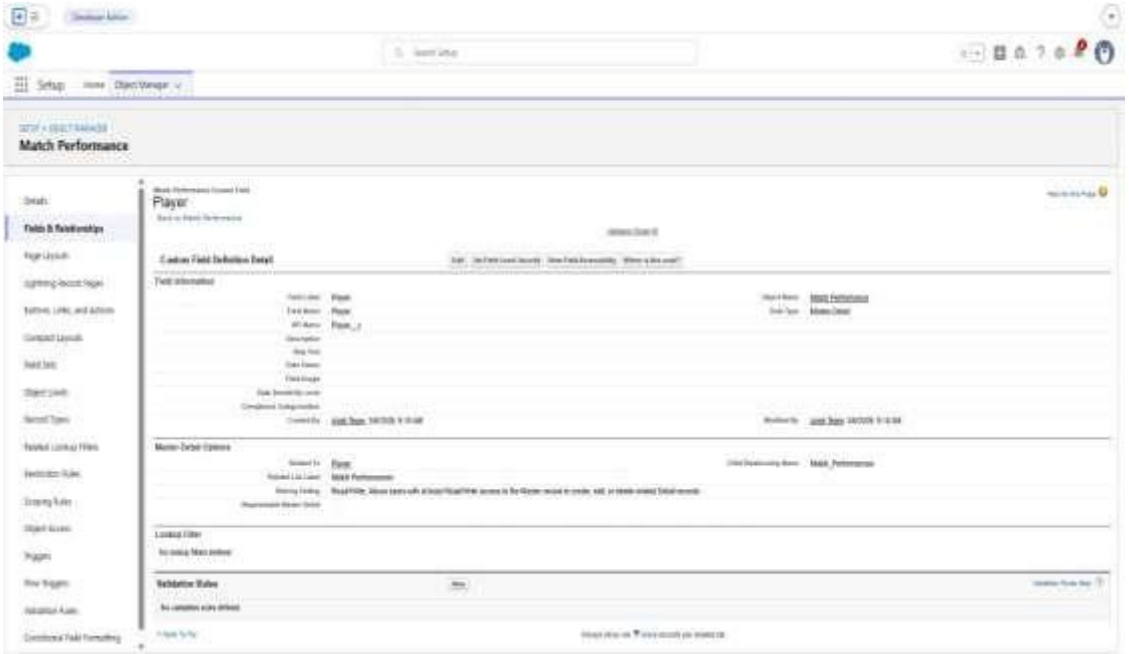
10. Data Type : Master - Detail Relationship

Related To : Player

Field Label : Player

Field Name : Auto Populates

Click on Next → Next → Save.



Milestone 6 : Roll-up Summary

Activity 1 : Create Roll-up Summary for Player object.

1. Data Type : Roll-up Summary Field

Label: Number of 50's

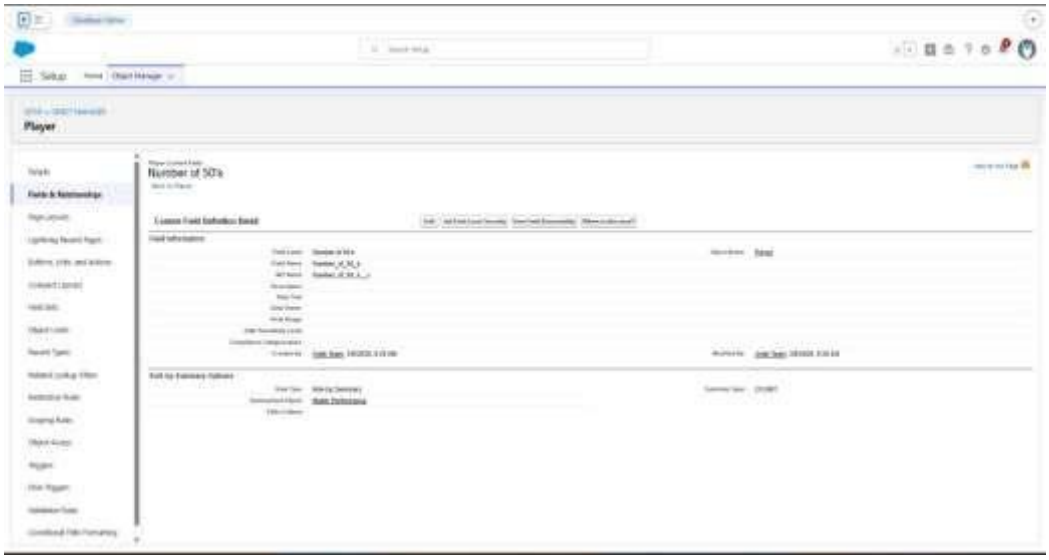
Field Name : Auto Populates

Summarized Object : Match Performances

Select Roll-up Type : COUNT

Filter Criteria : Only records meeting certain criteria should be included in the calculation.

Click on Next → Next → Save and new.



2. Data Type : Roll-up Summary

Field Label: Number of 100's

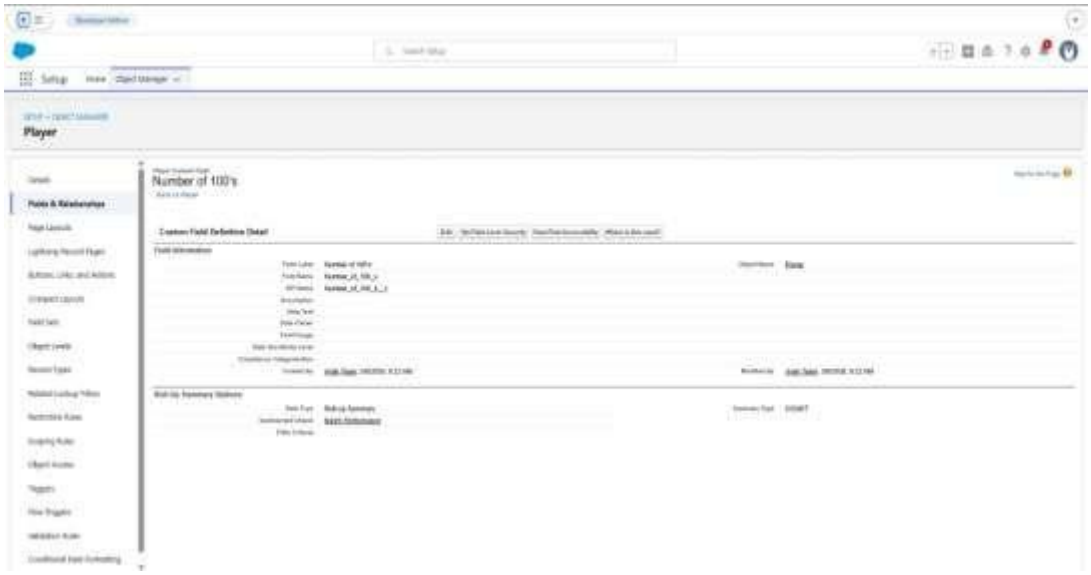
Field Name : Auto Populates

Summarized Object : Match Performances

Select Roll-up Type : COUNT

Filter Criteria : Only records meeting certain criteria should be included in the calculation.

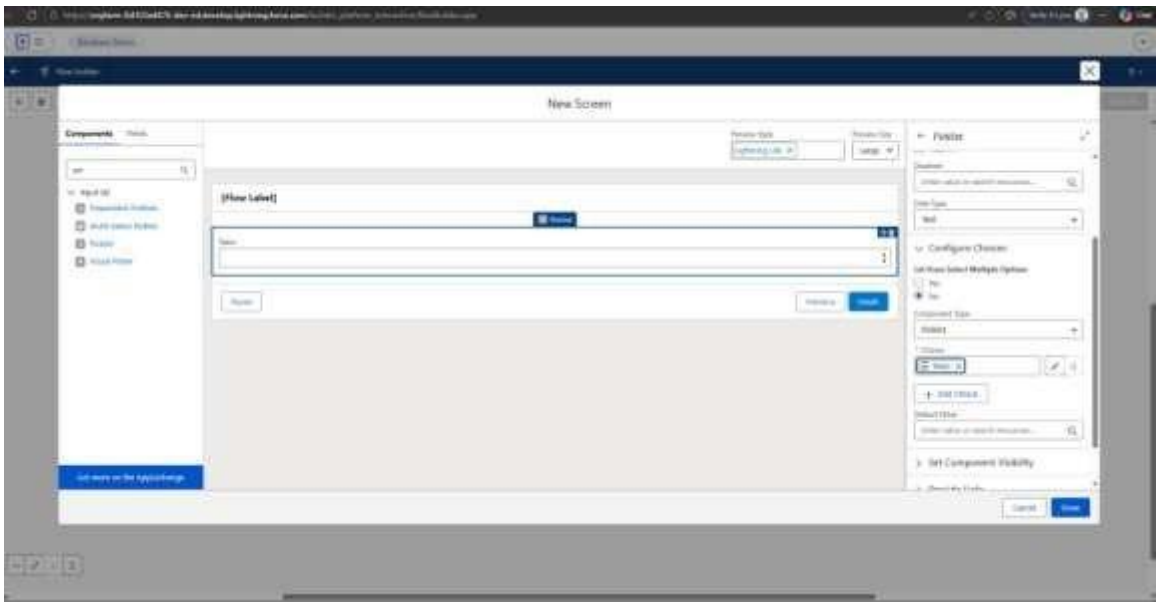
Click on Next → Next → Save and new.



Milestone 7 : Flows

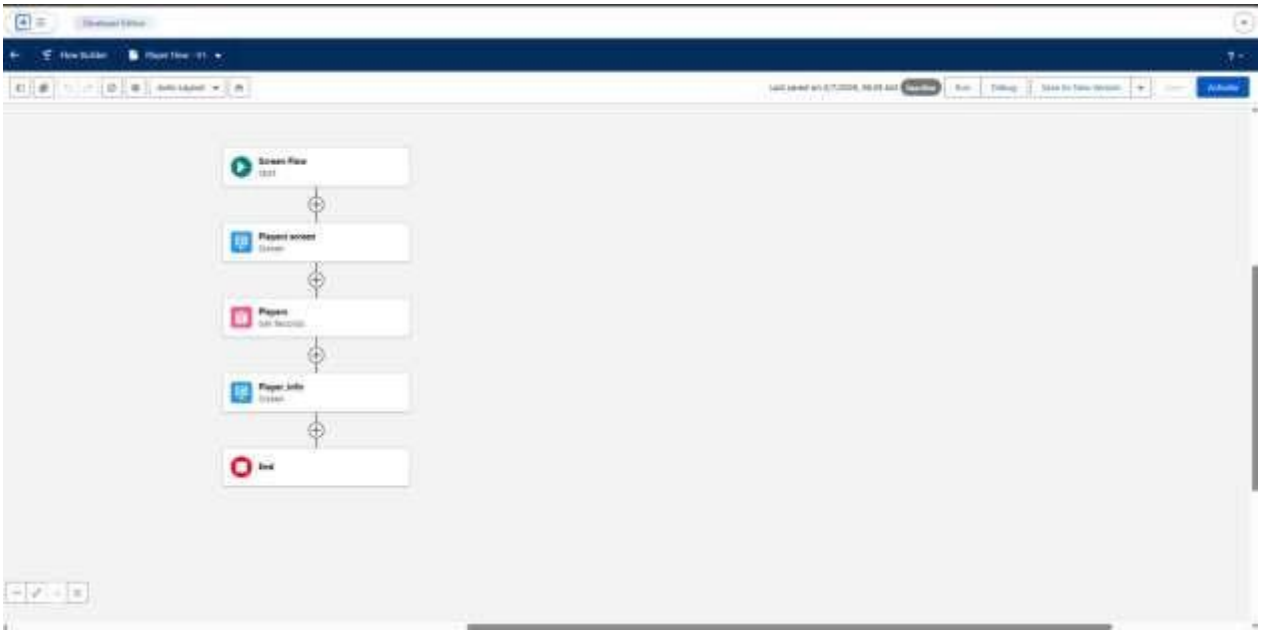
Activity 1 : Screen Flow

1. Go to setup, Type Flow in quick find box →
   Click on the Flow and Select the

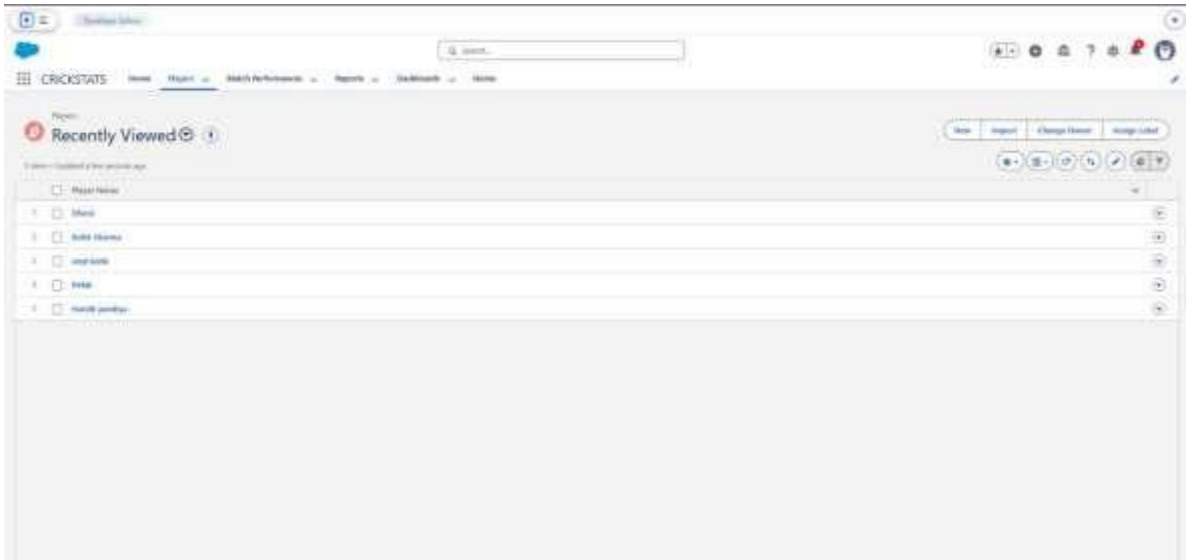


2. Flow Label : Player Flow Flow API Name :

Player_Flow



FUNCTIONAL & PERFORMANCE TESTING



Conclusion

CRICKSTATS successfully implements a cloud-based cricket performance tracking system using Salesforce. The system automates data management, improves reportingaccuracy, and supports informed decisionmaking.

The project demonstrates practical application of SDLC, Agile methodology, and

CRM-based development.
